DIGITAL FILE AND PROOF SPECIFICATIONS

DIGITAL FILES:

The following specifications are for BOPI's digital work flow. BOPI prefers Acrobat PDF files. We also accept files sent in these programs.

Illustrator CS
Photoshop
Adobe Acrobat

Indesign CS
Microsoft Word and Publisher

BOPI prefers a clean PDF file that includes .125 bleed, artwork/graphics are CMYK and fonts are embedded. Bopi Pdf settings can be requested.

Native files need to be accompanied by fonts and artwork/graphics.
Trapping on files will be done through BOPI's Kodak Prinergy System.
Any additional spot colors or varnishes need to be supplied as layers or as a separate document.
Maximum Ink Density should not exceed 280% for conventional print and 260% for digital print.
Files that will print as versions need to be set up in the appropriate program in layers for each version.

PHOTO FORMATS:

EPS or TIFF without LZW
Photos need to be converted to CMYK

Photoshop settings are:
GCR Medium
Total Ink Limit 280%

Black Ink Limit 100%
Dot Gain 20

MEDIA FORMATS :

CD/DVD
Jump Drives

USB external disk
Fire Wire external disk

An INSITE account can be setup for clients that want to use BOPI's Insite Prinergy System to upload, process, proof and approve their files online. Contact BOPI or your sales person for information.

Files can also be uploaded to:
Bopi Clients: https://www.bopi.com/upload-files-bopi/
JK Creative Clients: https://www.bopi.com/upload-files-jkc/
or if less than 10meg can be emailed to prepress@bopi.com.

PrePress contact is Craig Long at 800-2982674 ext. 211 or email at clong@bopi.com.
